Catalogue Description
Introduction to sequential and linked structures. File access including sequential, indexed sequential and other file organizations. Internal structures including stacks, queues, trees, and graphs. Algorithms for implementing and manipulating structured objects. Big-O-notation.

Course Objective
The choice of appropriate data structures is key in the development of efficient algorithms. In fact, it is virtually impossible to create efficient algorithms without a good understanding of a number of fundamental data structures. This course
- introduces important and fundamental data structures
- while discussing how they are used in a number of common algorithms
- and explaining how to measure algorithm efficiency.

This course gives a rigorous treatment of algorithms and data structures. After taking this course the student will understand the predominant methods used to develop and analyze efficient algorithms.

Student Outcomes Covered by This Course
C. Apply computer science theory and mathematical models to comprehend the tradeoffs involved in various design choices.

Prerequisites
CS 202 and MAT 181.

Professor
Dr. Wolfgang W. Bein
wolfgang.bein@unlv.edu, http://www.egr.unlv.edu/~bein/
Office: TBE B 381, (702) 895-1477
Office Hours: Thursday 2:30 pm – 5:30 pm; Friday 1:00 pm – 2:30 pm.

Teaching Assistant
Kaushik Deshmukh, Email: deshmkl1@unlv.nevada.edu
Office: Lab, TBE B 346, Office Hours: Monday 12:00 pm – 1:00 pm, Tuesday 3:00 pm – 4:00 pm, Wednesday 12:00 pm – 1:00 pm, Thursday 2:30 pm – 3:00 pm.

Textbook
Machine Requirement
All programming assignments must be written to run on machine bobby.cs.unlv.edu under the g++ compiler. Program submissions are by email to the TA.

Examinations and Assignments
Assignments
• There will be about 10 projects/assignments. (Projects/assignments count for 40% of the grade).
  To receive credit programs must compile and run under bobby. Assignments and programs must be submitted by the deadline.
Examinations
• Examination 1: Friday, February 23 (counts for 15% of the grade).
• Examination 1: Friday, April 13 (counts for 15% of the grade).
• Final Exam (cumulative, covers all material): Friday, May 11 (counts for 30% of the grade) (cumulative, covers all material).

There are no make-up tests. There may be an additional quiz. In that case the quiz is worth 5% and the final is worth 25%.

Attendance
Attendance is required. Class role is taken at the beginning of each session. Irregular attendance will reduce the class grade.

Tentative Schedule

Jan 19   Introduction: Mathematical Review; Complex Number Project.
Jan 26   Asymptotic Complexity: Big-Oh, Theta, Omega. The Maximum Subsequence Sum Problem.
Feb 2    Recursive and Non-Recursive Run Time Analysis, Examples; Recurrence relations, Master Theorem.
Feb 9    Sorting I: Elementary Sorting Algorithms; Elementary Data Structures: Linked Lists, Stacks, Queues.
Feb 16   Tree Traversals, Expression Trees, Postfix Expressions. Implementation of Trees. Review.
Feb 23   Tree Traversal Project. Examination I.
Mar 9    AVL Tree continued. Implementation of BST and AVL.
March 16 Red Black Trees, 2-3 Trees, B-Trees
March 23 Binary Heaps, Mergeable (Binomial) Heaps, Event Simulation Project.
March 30 Spring Break.
April 6  Sorting II: Mergesort, Quicksort, Heapsort, Slowsort, Review.
April 13 Splay Trees, Examination II
April 20 Hashing, Disjoint Set Data Structures.
April 27 Graph Representations, Algorithms on Graphs.
May 4    Algorithms on Graphs (continued), Review.
May 11   Final Examination.

Caveat
The schedule and procedures for this course are subject to change. Changes are posted on the announcement web page for the course.
Academic Misconduct—Academic integrity is a legitimate concern for every member of the campus community; all share in upholding the fundamental values of honesty, trust, respect, fairness, responsibility and professionalism. By choosing to join the UNLV community, students accept the expectations of the Student Academic Misconduct Policy and are encouraged when faced with choices to always take the ethical path. Students enrolling in UNLV assume the obligation to conduct themselves in a manner compatible with UNLV’s function as an educational institution. An example of academic misconduct is plagiarism. Plagiarism is using the words or ideas of another, from the Internet or any source, without proper citation of the sources. See the Student Academic Misconduct Policy (approved December 9, 2005) located at: https://www.unlv.edu/studentconduct/student-conduct.

Copyright—The University requires all members of the University Community to familiarize themselves with and to follow copyright and fair use requirements. You are individually and solely responsible for violations of copyright and fair use laws. The university will neither protect nor defend you nor assume any responsibility for employee or student violations of fair use laws. Violations of copyright laws could subject you to federal and state civil penalties and criminal liability, as well as disciplinary action under University policies. Additional information can be found at: http://www.unlv.edu/provost/copyright.

Disability Resource Center (DRC)—The UNLV Disability Resource Center (SSC-A 143, http://drc.unlv.edu/, 702-895-0866) provides resources for students with disabilities. If you feel that you have a disability, please make an appointment with a Disabilities Specialist at the DRC to discuss what options may be available to you. If you are registered with the UNLV Disability Resource Center, bring your Academic Accommodation Plan from the DRC to the instructor during office hours so that you may work together to develop strategies for implementing the accommodations to meet both your needs and the requirements of the course. Any information you provide is private and will be treated as such. To maintain the confidentiality of your request, please do not approach the instructor in front of others to discuss your accommodation needs.

Religious Holidays Policy—Any student missing class quizzes, examinations, or any other class or lab work because of observance of religious holidays shall be given an opportunity during that semester to make up missed work. The make-up will apply to the religious holiday absence only. It shall be the responsibility of the student to notify the instructor within the first 14 calendar days of the course for fall and spring courses (excepting modular courses), or within the first 7 calendar days of the course for summer and modular courses, of his or her intention to participate in religious holidays which do not fall on state holidays or periods of class recess. For additional information, please visit: http://catalog.unlv.edu/content.php?catoid=6&navoid=531.

Transparency in Learning and Teaching—The University encourages application of the transparency method of constructing assignments for student success. Please see these two links for further information: https://www.unlv.edu/provost/teachingandlearning https://www.unlv.edu/provost/transparency.

Incomplete Grades—The grade of I—Incomplete—can be granted when a student has satisfactorily completed three-fourths of course work for that semester/session but for reason(s) beyond the student’s control, and acceptable to the instructor, cannot complete the last part of the course, and the instructor believes that the student can finish the course without repeating it. The incomplete work must be made up before the end of the following regular semester for undergraduate courses. Graduate students receiving “I” grades in 500-, 600-, or 700-level courses have up to one calendar year to complete the work, at the discretion of the instructor. If course requirements are not completed within the time indicated, a grade of F will be recorded and the GPA will be adjusted accordingly. Students who are fulfilling an Incomplete do not register for the course but make individual arrangements with the instructor who assigned the I grade.

Tutoring and Coaching—The Academic Success Center (ASC) provides tutoring, academic success coaching and other academic assistance for all UNLV undergraduate students. For information regarding tutoring subjects, tutoring times, and other ASC programs and services, visit http://www.unlv.edu/asc or call 702-895-3177. The ASC building is located across from the Student Services Complex (SSC). Academic success coaching is located on the second floor of the SSC (ASC Coaching Spot). Drop-in tutoring is located on the second floor of the Lied Library and College of Engineering TEB second floor.

UNLV Writing Center—One-on-one or small group assistance with writing is available free of charge to UNLV students at the Writing Center, located in CDC-3-301. Although walk-in consultations are sometimes available, students with appointments will receive priority assistance. Appointments may be made in person or by calling 702-895-3908. The student’s Rebel ID Card, a copy of the assignment (if possible), and two copies of any writing to be reviewed are requested for the consultation. More information can be found at: http://writingcenter.unlv.edu/

Rebelmail—By policy, faculty and staff should e-mail students’ Rebelmail accounts only. Rebelmail is UNLV’s official e-mail system for students. It is one of the primary ways students receive official university communication such as information about deadlines, major campus events, and announcements. All UNLV students receive a Rebelmail account after they have been admitted to the university. Students’ e-mail prefixes are listed on class rosters. The suffix is always @unlv.nevada.edu. Emailing within WebCampus is acceptable.
